

Winning Mood “club” support program

Soccer is growing fast, players are getting better and the number of players are going up in the club. There is a need for professional support in managing and technical support. We're offering this! !

“ It's your hobby but our job” .

We're professionals with a Dutch coaching and soccer management background and we are ready to support clubs and leagues in upgrading the level of the players and their coaches.

Since 1986 our organization has send fully licensed coaches over to the USA to help and support clubs in the development of players and coaches.

We've grown from working for one club in Wisconsin in 1986 till over 30 clubs in 12 States in the last couple of years.

All our coaches are fully Dutch licensed coaches which means that they all went to the same coach classes in the Netherlands, worked with very young, recreational, select and top youth players and all have their youth and adult coaching licenses.

Seeing the constantly growth of leagues and clubs **Winning Mood** is focusing for the coming years on total club support in which developing players and coaches, based on the Dutch players and coaching philosophy, will be the main focus.

Comment:

We have successfully worked with a Winning Mood coach during the past two years. Overall we feel our coaching program has improved. Feedback from our coaches, 2,000 players and parents has been overwhelmingly positive. “Our Winning Mood coach works actively with the age group coordinator and coaches of our league and also trains four of our competitive teams”

***Rik Thorbecke
Coaching coordinator
